Format Next Steps

- For all drafts:
 - Incorporate feedback received during IETF 89 (as appropriate)
 - Finish drafts and start the formal publication process (which includes more community review) before IETF 90
- Create a Statement of Work to write the specs and start the community review process during IETF 90
 - Specification(s) for tool(s) that create XML, HTML, PDF, and TXT documents, following the requirements and profiles defined in the drafts/RFCs produced by the RFC Format Design Team
- Start development of tools based on well-defined specs by IETF 91
